Mining the World Wide Web: An Information Search Approach (The Information Retrieval Series)
George Chang, Marcus Healey, James A. M. McHugh, T.L. Wang
Mining the World Wide Web: An Information Search Approach explores the concepts and techniques of Web mining, a promising and rapidly growing field of computer science research. Web mining is a multidisciplinary field, drawing on such areas as artificial intelligence, databases, data mining, data warehousing, data visualization, information retrieval, machine learning, markup languages, pattern recognition, statistics, and Web technology. *Mining the World Wide Web* presents the Web mining material from an information search perspective, focusing on issues relating to the efficiency, feasibility, scalability and usability of searching techniques for Web mining.
Mining the World Wide Web is designed for researchers and developers of Web information systems and also serves as an excellent supplemental reference to advanced level courses in data mining, databases and information retrieval.

From reader reviews:

Bob Bartlett:

Book is written, printed, or outlined for everything. You can recognize everything you want by a publication. Book has a different type. As we know that book is important factor to bring us around the world. Next to that you can your reading talent was fluently. A publication Mining the World Wide Web: An Information Search Approach (The Information Retrieval Series) will make you to always be smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think that open or reading the book make you bored. It isn't make you fun. Why they are often thought like that? Have you seeking best book or suitable book with you?

Miguel Willis:

What do you in relation to book? It is not important with you? Or just adding material when you need something to explain what the one you have problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to do others business, it is make one feel bored faster. And you have time? What did you do? Every person has many questions above. They must answer that question mainly because just their can do that. It said that about book. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this particular Mining the World Wide Web: An Information Search Approach (The Information Retrieval Series) to read.

Terry Kline:

Nowadays reading books become more and more than want or need but also get a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge even the information inside the book that will improve your knowledge and information. The details you get based on what kind of guide you read, if you want have more knowledge just go with schooling books but if you want feel happy read one using theme for entertaining like comic or novel. The actual Mining the World Wide Web: An Information Search Approach (The Information Retrieval Series) is kind of book which is giving the reader unforeseen experience.

Matthew Ramey:

This Mining the World Wide Web: An Information Search Approach (The Information Retrieval Series) is great reserve for you because the content and that is full of information for you who all always deal with world and possess to make decision every minute. This particular book reveal it facts accurately using great manage word or we can claim no rambling sentences inside it. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only provides straight forward sentences but tough core information with wonderful delivering sentences. Having Mining the World Wide Web: An Information Search Approach (The Information Retrieval Series) in your hand like keeping the world in your arm, details in it is not ridiculous a single. We can say that no guide that offer you world throughout ten or fifteen second right but

this e-book already do that. So , it is good reading book. Heya Mr. and Mrs. busy do you still doubt that will?
