Systems of Equations: Substitution, Simultaneous, Cramer's Rule: Algebra Practice Workbook with Answers (Improve Your Math Fluency Series) Chris McMullen

CONTENTS: This algebra workbook is devoted to solving systems of equations. Specifically, it helps to develop fluency with the following algebra skills:

- solving two equations with two unknowns (x and y)
- solving three equations with three unknowns (x, y, and z)
- the method of substitution
- simultaneous equations (setting up equal and opposite coefficients)
- 2x2 and 3x3 determinants
- Cramer's rule for systems of equations

AUTHOR: Chris McMullen earned his Ph.D. in physics from Oklahoma State University and currently teaches physics at Northwestern State University of Louisiana. He developed the *Improve Your Math Fluency* series of workbooks to help students become more fluent in basic math skills.

EXAMPLES: Each section begins with a concise description of the main concepts, an outline of the strategy, and an example with explanations. The examples should serve as a useful guide until students are able to solve the problems independently.

ANSWERS: Answers to 100% of the exercises are tabulated at the back of the book. This helps students develop confidence and ensures that students practice correct techniques, rather than practice making mistakes.

PRACTICE: With no pictures, this workbook is geared strictly toward learning the material and developing fluency through practice.

PHOTOCOPIES: The copyright notice permits parents/teachers who purchase one copy or borrow one copy from a library to make photocopies for their own children/students only. This is very convenient if you have multiple children/students or if a child/student needs additional practice.
