This book provides an authoritative overview of botulinum neurotoxin (BoNT) treatment menus for 14 pain categories with an evidence based literature review on each pain disorder, illustrative figures along with brief video clips showing the techniques and patient interviews.

Introductory chapters cover basic information about the mechanism, function and the analgesic effects of the BoNTs based on the data derived from animal studies. Clinical chapters define pain in conditions such as post-herpetic and post-traumatic neuralgias, plantar fasciitis, low back pain, post-surgical pain syndromes and migraine in detail, provide discussion of current modes of treatment and updated information on BoNT therapy. Each chapter also includes illustrative case histories.

Botulinum Toxin Treatment of Pain Disorders will prove an invaluable resource for clinicians and researchers involved in the treatment of pain disorders including neurologists, pain medicine specialists, anesthesiologists, internists, those conducting research in pharmacology and toxicology as well as students in these areas.
