Restorative Redevelopment of Devastated Ecocultural Landscapes (Integrative Studies in Water Management & Land Deve)

Restorative Redevelopment of Devastated Ecocultural Landscapes (Integrative Studies in Water Management & Land Deve)

A fusion of ecological restoration and sustainable development, restorative redevelopment represents an emerging paradigm for remediating landscapes. Rather than merely fixing the broken bits and pieces of nature, restorative development advocates the reuse of devastated landscapes to improve the value and livability of a location for humans at the same time as effectively reinstating natural processes and functions. **Restorative Redevelopment of Devastated Ecocultural Landscapes** explores the use of this approach to address the long-term, sustainable reparation of the fabled marshlands of southern Iraq destroyed by Saddam Hussein, as well as numerous examples of other ecologically sensitive regions.

Case studies presented include:

- Southern marshlands Iraq
- Hula swamp, Israel
- Azraq Oasis, Jordan
- Las Vegas Wash, USA
- Xochimilco, Mexico
- Pantanal, Brazil
- Clark County Wetlands Park, USA
- Tonle Sap, Cambodia
- Lake Titicaca, Peru
- Nature Reserves, Jordan

The book reviews successfully-implemented and celebrated case studies from more than 15 countries around the world which, either in whole or in part, can offer valuable insight into the restorative development of the Iraqi marshlands as well as other devastated ecocultural landscapes. It presents practical approaches for sustaining the process of restoration efforts, both during and after the reparation work has been accomplished. The editor suggests solutions targeted for Iraq but that also have resonance in other regions devastated by conflict and natural disasters. He takes a synoptic or cross-system approach to problem solving when repairing large-scale landscapes that have been devastated by conflict or natural disasters such as tsunami-damaged Indonesia and earthquake-ravaged Haiti.

Gussie Steller:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your moment to upgrading your mind proficiency or thinking skill even analytical thinking? Then you are experiencing problem with the book compared to can satisfy your small amount of time to read it because this all time you only find reserve that need more time to be study. Restorative Redevelopment of Devastated Ecocultural Landscapes (Integrative Studies in Water Management & Land Deve) can be your answer mainly because it can be read by anyone who have those short extra time problems.

Travis Mahon:

As a scholar exactly feel bored in order to reading. If their teacher inquired them to go to the library as well as to make summary for some reserve, they are complained. Just very little students that has reading's heart and soul or real their hobby. They just do what the educator want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Restorative Redevelopment of Devastated Ecocultural

Landscapes (Integrative Studies in Water Management & Land Deve) can make you experience more interested to read.
