Twelve Theories of Human Nature Leslie Stevenson, David L. Haberman, Peter Matthews Wright

Over five previous editions, *Ten Theories of Human Nature* has been a remarkably popular introduction to some of the most influential developments in Western and Eastern thought. Now titled *Twelve Theories of Human Nature*, the sixth edition adds chapters on Islam (by Peter Wright) and Freud to those on Confucianism, Hinduism, Buddhism, Plato, Aristotle, the Bible, Kant, Marx, Sartre, and Darwinism. The authors juxtapose the ideas of these and other thinkers and traditions in a way that helps students understand how humanity has struggled to comprehend its nature.

To encourage students to think critically for themselves and to underscore the similarities and differences between the many theories, the book examines each one on four points--the nature of the universe, the nature of humanity, the diagnosis of the ills of humanity, and the proposed cure for these problems.

Ideal for introductory courses in human nature, philosophy, religious studies, and intellectual history, this unique volume will engage and motivate students and other readers to consider how we can understand and improve both ourselves and human society.
