Stephen A. Maas

The RF and Microwave Circuit Design Cookbook (Artech House Mobile Communications) Stephen A. Maas

In the fast-paced, "I-need-it-done-by-yesterday" world of microwave engineering, it's more important than ever to get your circuit designs up-and-running on time and to specifications. Authored by a well-known expert in the industry, this unique new book helps you do just that by presenting no-nonsense, proven-under-fire microwave circuit design "recipes" that you can follow for fast design results -- without having to wade through pages of theoretical or academic rhetoric.

The RF and Microwave Circuit Design Cookbook is written solely for today's practicing engineer. Using a lively, easy-to-read style, it reveals practical, tested methods for designing and implementing a wide range of nonlinear RF and microwave circuits, including all types of mixers, frequency multipliers, and more. A special feature is a complete treatment of FET resistive mixers, which offer the lowest intermodulation distortion of all types of mixers. You also get hard-to-find information on creating both square law and envelope diode detectors.

From reader reviews:

Charles Anthony:

Nowadays reading books become more than want or need but also turn into a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book which improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want get more knowledge just go with schooling books but if you want truly feel happy read one together with theme for entertaining such as comic or novel. The particular The RF and Microwave Circuit Design Cookbook (Artech House Mobile Communications) is kind of book which is giving the reader capricious experience.

Andrew Schulz:

Can you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you never know the inside because don't evaluate book by its deal with may doesn't work the following is difficult job because you are frightened that the inside maybe not as fantastic as in the outside search likes. Maybe you answer could be The RF and Microwave Circuit Design Cookbook (Artech House Mobile Communications) why because the fantastic cover that make you consider about the content will not disappont anyone. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.

Robert Carlson:

What is your hobby? Have you heard in which question when you got students? We believe that that concern was given by teacher with their students. Many kinds of hobby, All people has different hobby. And also you know that little person similar to reading or as reading become their hobby. You should know that reading is very important along with book as to be the thing. Book is important thing to increase you knowledge, except your current teacher or lecturer. You see good news or update about something by book. Numerous books that can you choose to use be your object. One of them is The RF and Microwave Circuit Design Cookbook (Artech House Mobile Communications).

Cheryl Steele:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from your book. Book is published or printed or descriptive from each source in which filled update of news. In this modern era like currently, many ways to get information are available for anyone. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just looking for the The RF and Microwave Circuit Design Cookbook (Artech House Mobile Communications) when you necessary it?
