Simone Santini

Exploratory Image Databases: Content-Based Retrieval (Communications, Networking and Multimedia) Simone Santini

The explosion of computer use and internet communication has placed new emphasis on the ability to store, retrieve and search for all types of images, both still photo and video images. The success and the future of visual information retrieval depends on the cutting edge research and applications explored in this book. It combines the expertise from both computer vision and database research.

Unlike text retrieval and text/numeric databases the challenges of image databases are enormous. How do you use "data mining" to search for an image if you do not have "key words" to search? **Exploratory Image Databases** introduces the idea that it is possible to solve this problem by merging database systems into a single search and browse activity called "exploration."

Exploratory Image Databases is one of the first single-author books that unifies the critical emerging topic of image databases. A new approach to image databases, the work is divided into four central parts: introduction to the problems that image database research must solve; computer vision and information retrieval techniques; image database issues; and interface and engines for visual searches.

Example: Imagine the difficulty of building and using a database for "face recognition," where an image of a face is used. In order to effectively use the image a huge number of characteristics would need to be entered in the database. The goal of future image databases is to use hardware and software to recognize and categorize images without typing in characteristics.

- * Comprehensive coverage of the image analysis as well as the database/theoretical aspects of image databases.
- * Extensive coverage of interfaces and interaction models, with a theoretical framework for the development of new interaction schemes.
- * Identifies three interaction models between users and image databases, two of which have no counterpart in traditional databases.
- * Coverage of the relation between image and text, including mixed search models and the automatic determination of the relation between images and text on large corpuses like the web.
- * Analysis of the process of signification in images and its influence on the interaction models and technological problems of image databases.

From reader reviews:

Jean Ashburn:

As people who live in often the modest era should be upgrade about what going on or information even knowledge to make them keep up with the era which can be always change and make progress. Some of you maybe can update themselves by looking at books. It is a good choice for you personally but the problems coming to you actually is you don't know what kind you should start with. This Exploratory Image Databases: Content-Based Retrieval (Communications, Networking and Multimedia) is our recommendation to help you keep up with the world. Why, as this book serves what you want and wish in this era.

Muriel Carpenter:

The reason why? Because this Exploratory Image Databases: Content-Based Retrieval (Communications, Networking and Multimedia) is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will shock you with the secret that inside. Reading this book next to it was fantastic author who else write the book in such remarkable way makes the content inside of easier to understand, entertaining method but still convey the meaning fully. So , it is good for you for not hesitating having this ever again or you going to regret it. This book will give you a lot of benefits than the other book possess such as help improving your skill and your critical thinking means. So , still want to hesitate having that book? If I had been you I will go to the publication store hurriedly.

Lloyd Stec:

Playing with family within a park, coming to see the ocean world or hanging out with pals is thing that usually you could have done when you have spare time, subsequently why you don't try issue that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Exploratory Image Databases: Content-Based Retrieval (Communications, Networking and Multimedia), it is possible to enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang type is it? Oh can occur its mind hangout guys. What? Still don't buy it, oh come on its referred to as reading friends.

Julia Watkins:

Don't be worry if you are afraid that this book can filled the space in your house, you may have it in e-book approach, more simple and reachable. This kind of Exploratory Image Databases: Content-Based Retrieval (Communications, Networking and Multimedia) can give you a lot of buddies because by you checking out this one book you have issue that they don't and make you more like an interesting person. That book can be one of one step for you to get success. This publication offer you information that maybe your friend doesn't learn, by knowing more than some other make you to be great individuals. So , why hesitate? We need to have Exploratory Image Databases: Content-Based Retrieval (Communications, Networking and Multimedia).
