Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding)

Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding)

The series Structure and Bonding publishes critical reviews on topics of research concerned with chemical structure and bonding. The scope of the series spans the entire Periodic Table and addresses structure and bonding issues associated with all of the elements. It also focuses attention on new and developing areas of modern structural and theoretical chemistry such as nanostructures, molecular electronics, designed molecular solids, surfaces, metal clusters and supramolecular structures. Physical and spectroscopic techniques used to determine, examine and model structures fall within the purview of Structure and Bonding to the extent that the focus is on the scientific results obtained and not on specialist information concerning the techniques themselves. Issues associated with the development of bonding models and generalizations that illuminate the reactivity pathways and rates of chemical processes are also relevant. The individual volumes in the series are thematic. The goal of each volume is to give the reader, whether at a university or in industry, a comprehensive overview of an area where new insights are emerging that are of interest to a larger scientific audience. Thus each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years should be presented using selected examples to illustrate the principles discussed. A description of the physical basis of the experimental techniques that have been used to provide the primary data may also be appropriate, if it has not been covered in detail elsewhere. The coverage need not be exhaustive in data, but should rather be conceptual, concentrating on the new principles being developed that will allow the reader, who is not a specialist in the area covered, to understand the data presented. Discussion of possible future research directions in the area is welcomed. Review articles for the individual volumes are invited by the volume editors.

Readership: research scientists at universities or in industry, graduate students

Special offer

For all customers who have a standing order to the print version of Structure and Bonding, we offer free access to the electronic volumes of the Series published in the current year via SpringerLink.

From reader reviews:

Yvonne Terrell:

This Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) book is just not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is definitely information inside this reserve incredible fresh, you will get details which is getting deeper an individual read a lot of information you will get. This particular Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) without we realize teach the one who reading it become critical in considering and analyzing. Don't always be worry Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) can bring any time you are and not make your handbag space or bookshelves' turn out to be full because you can have it in the lovely laptop even mobile phone. This Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) having fine arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Linda Yohe:

Do you among people who can't read enjoyable if the sentence chained inside straightway, hold on guys this aren't like that. This Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) book is readable by simply you who hate the perfect word style. You will find the facts here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to offer to you. The writer connected with Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) content conveys thinking easily to understand by many people. The printed and e-book are not different in the written content but it just different by means of it. So , do you nevertheless thinking Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) is not loveable to be your top listing reading book?

Owen Bourne:

Do you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try to pick one book that you just dont know the inside because don't determine book by its cover may doesn't work this is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer is usually Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) why because the excellent cover that make you consider in regards to the content will not disappoint a person. The inside or content is fantastic as the outside or cover. Your reading 6th sense will directly guide you to pick up this book.

Keith Abell:

The book untitled Applications of Density Functional Theory to Chemical Reactivity (Structure and Bonding) contain a lot of information on it. The writer explains your ex idea with easy way. The language is very straightforward all the people, so do certainly not worry, you can easy to read it. The book was written

by famous author. The author brings you in the new period of literary works. You can easily read this book because you can continue reading your smart phone, or device, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can available their official web-site as well as order it. Have a nice go through.
