Vikram Krishnamurthy

Partially Observed Markov Decision Processes: From Filtering to Controlled Sensing Vikram Krishnamurthy

Covering formulation, algorithms, and structural results, and linking theory to real-world applications in controlled sensing (including social learning, adaptive radars and sequential detection), this book focuses on the conceptual foundations of partially observed Markov decision processes (POMDPs). It emphasizes structural results in stochastic dynamic programming, enabling graduate students and researchers in engineering, operations research, and economics to understand the underlying unifying themes without getting weighed down by mathematical technicalities. Bringing together research from across the literature, the book provides an introduction to nonlinear filtering followed by a systematic development of stochastic dynamic programming, lattice programming and reinforcement learning for POMDPs. Questions addressed in the book include: when does a POMDP have a threshold optimal policy? When are myopic policies optimal? How do local and global decision makers interact in adaptive decision making in multi-agent social learning where there is herding and data incest? And how can sophisticated radars and sensors adapt their sensing in real time?

From reader reviews:

Mildred Ortiz:

What do you think about book? It is just for students since they are still students or that for all people in the world, what the best subject for that? Only you can be answered for that concern above. Every person has several personality and hobby for each and every other. Don't to be pressured someone or something that they don't wish do that. You must know how great as well as important the book Partially Observed Markov Decision Processes: From Filtering to Controlled Sensing. All type of book would you see on many sources. You can look for the internet resources or other social media.

Shannon Blackshear:

As people who live in the actual modest era should be upgrade about what going on or facts even knowledge to make all of them keep up with the era which is always change and move forward. Some of you maybe will update themselves by reading through books. It is a good choice for you but the problems coming to an individual is you don't know which one you should start with. This Partially Observed Markov Decision Processes: From Filtering to Controlled Sensing is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

Theo Garcia:

The reserve untitled Partially Observed Markov Decision Processes: From Filtering to Controlled Sensing is the e-book that recommended to you you just read. You can see the quality of the guide content that will be shown to a person. The language that author use to explained their ideas are easily to understand. The article author was did a lot of research when write the book, to ensure the information that they share for your requirements is absolutely accurate. You also can get the e-book of Partially Observed Markov Decision Processes: From Filtering to Controlled Sensing from the publisher to make you more enjoy free time.

Wayne Queen:

You can spend your free time to learn this book this reserve. This Partially Observed Markov Decision Processes: From Filtering to Controlled Sensing is simple to create you can read it in the recreation area, in the beach, train in addition to soon. If you did not have got much space to bring often the printed book, you can buy the e-book. It is make you easier to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
