The Renewable Energy Home Handbook: Insulation & energy saving, Living off-grid, Bio-mass heating, Wind turbines, Solar electric PV generation, Solar water heating, Heat pumps, & more
Lindsay Porter

The Renewable Energy Home Handbook is biased towards the practical, and covers the installation of all leading types of alternative domestic energy sources - from ground- and air-source heat pumps, PV solar electricity generation and solar water heating, to bio-mass domestic heating systems and wind turbines. Discussing the pros and cons of each technology, it also provides you with a clear overview of what's genuinely required and the benefits to be gained from each system.

The author, Lindsay Porter, is best known for his books on motor vehicle technology, making car mechanics and body repairs easy to understand and carry out. But alternative energy and conservation have long been a passion for him and his wife, Shan, so this manual is very much a labour of love. Here, Lindsay applies his commitment to making difficult subjects easy for everyone to understand to the money-saving - planet-saving - systems we can apply to our homes.

From reader reviews:

Lorena Repass:

Reading a publication can be one of a lot of task that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new info. When you read a e-book you will get new information because book is one of a number of ways to share the information or even their idea. Second, reading a book will make a person more imaginative. When you reading through a book especially fiction book the author will bring someone to imagine the story how the characters do it anything. Third, you can share your knowledge to other individuals. When you read this The Renewable Energy Home Handbook: Insulation & energy saving, Living off-grid, Bio-mass heating, Wind turbines, Solar electric PV generation, Solar water heating, Heat pumps, & more, you can tells your family, friends and also soon about yours guide. Your knowledge can inspire different ones, make them reading a guide.

Sharon Bufkin:

The publication with title The Renewable Energy Home Handbook: Insulation & energy saving, Living off-grid, Bio-mass heating, Wind turbines, Solar electric PV generation, Solar water heating, Heat pumps, & more includes a lot of information that you can study it. You can get a lot of profit after read this book. This kind of book exist new expertise the information that exist in this publication represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you with new era of the syndication. You can read the e-book on your smart phone, so you can read that anywhere you want.

Armando Lemaire:

In this period of time globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. The book that recommended to you personally is The Renewable Energy Home Handbook: Insulation & energy saving, Living off-grid, Bio-mass heating, Wind turbines, Solar electric PV generation, Solar water heating, Heat pumps, & more this e-book consist a lot of the information from the condition of this world now. This particular book was represented so why is the world has grown up. The words styles that writer make usage of to explain it is easy to understand. Typically the writer made some analysis when he makes this book. Here is why this book acceptable all of you.

Andrew Purdie:

Is it a person who having spare time then spend it whole day by watching television programs or just telling

lies on the bed? Do you need something new? This The Renewable Energy Home Handbook: Insulation & energy saving, Living off-grid, Bio-mass heating, Wind turbines, Solar electric PV generation, Solar water heating, Heat pumps, & more can be the reply, oh how comes? It's a book you know. You are thus out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these publications have than the others?
