Biochemical Pharmacology Michael Palmer

An integrated approach to the study of drug action mechanisms

Biochemical Pharmacology is a concise and contemporary textbook on the principles of drug action. It discusses representative drugs by example to explore the range of biochemical targets and mechanisms. The book explains some of the experiments that tell us how drugs work, and it outlines the physiological and pathological context that make those action mechanisms therapeutically useful.

Biochemical Pharmacology is intended primarily for students in biology and biochemistry at the advanced undergraduate or graduate levels. For classroom use, the illustrations from the book are separately available as PowerPoint slides. It is written in a conversational, vivid style that readily encourages students to explore this important area of medical science. Biochemical Pharmacology can also serve as an introduction for professionals in biosciences, as well as in pharmaceutical and health sciences.

Complete with numerous figures throughout the text, which are also available separately as PowerPoint slides, Biochemical Pharmacology:

- Explains the role of pharmacodynamics, pharmacokinetics, and drug metabolism in drug action
- Provides representative examples from the pharmacology of cell excitation, hormones, nitric oxide, chemotherapy, and others
- Examines emerging applications of ribonucleic acids as drugs and drug targets
- Discusses what researchers need to know about the problems of drug distribution, elimination, and toxicity

Biochemical Pharmacology is an important resource for anyone wishing to gain an in-depth understanding of drug action mechanisms and extremely useful for researchers wishing to explore some of the unanswered questions .

From reader reviews:

George Green:

Have you spare time for the day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a wander, shopping, or went to the actual Mall. How about open as well as read a book allowed Biochemical Pharmacology? Maybe it is to be best activity for you. You understand beside you can spend your time with the favorite's book, you can better than before. Do you agree with it is opinion or you have additional opinion?

Roberta Bourland:

What do you concentrate on book? It is just for students since they're still students or the item for all people in the world, what the best subject for that? Just you can be answered for that query above. Every person has diverse personality and hobby per other. Don't to be compelled someone or something that they don't want do that. You must know how great along with important the book Biochemical Pharmacology. All type of book is it possible to see on many solutions. You can look for the internet methods or other social media.

John Lopez:

In this 21st centuries, people become competitive in every single way. By being competitive right now, people have do something to make these individuals survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that at times many people have underestimated it for a while is reading. Yes, by reading a publication your ability to survive enhance then having chance to stand up than other is high. For yourself who want to start reading the book, we give you this kind of Biochemical Pharmacology book as starter and daily reading reserve. Why, because this book is greater than just a book.

Marcus Huskins:

That publication can make you to feel relax. This book Biochemical Pharmacology was bright colored and of course has pictures on the website. As we know that book Biochemical Pharmacology has many kinds or type. Start from kids until adolescents. For example Naruto or Detective Conan you can read and think you are the character on there. Therefore not at all of book are usually make you bored, any it can make you feel happy, fun and rest. Try to choose the best book in your case and try to like reading this.
