## **Cancer Gene Therapy by Viral and Non-viral Vectors (Translational Oncology)**

**Provides expert, state-of-the-art insight into the current progress of viral and non-viral gene therapy**

Translational medicine has opened the gateway to the era of personalized or precision medicine. No longer a one-size-fits-all approach, the treatment of cancer is now based on an understanding of underlying biologic mechanisms and is increasingly being tailored to the molecular specificity of a tumor.

This book provides a comprehensive overview of the pertinent molecular discoveries in the cancer field and explains how these are being used for gene-based cancer therapies. Designed as a volume in the Translational Oncology book series, *Cancer Gene Therapy by Viral and Non-viral Vectors* deals with the practice of gene-therapy, with reference to vectors for gene expression and gene transfer, as well as viral therapy. It covers the history and current and future applications of gene transfer in cancer, and provides expert insight on the progress of viral and non-viral gene therapy with regard to delivery system, vector design, potential therapeutic genes, and principles and regulations for cancer gene therapy.

Presented in three parts, *Cancer Gene Therapy by Viral and Non-viral Vectors* covers:

### **Delivery Systems**

- Translational Cancer Research: Gene Therapy by Viral and Non-viral Vectors
- Retroviruses for Cancer Therapy
- DNA Plasmids for Non-viral Gene Therapy of Cancer
- Cancer Therapy with RNAi delivered by Non-viral Membrane/Core Nanoparticles

### **Targeted Expression**

- Cancer Gene Therapy by Tissue-specific and Cancer-targeting Promptors
- MicroRNAs as Drugs and Drug Targets in Cancer

### **Principles of Clinical Trials in Gene Therapy**

- Regulatory issues for Manufacturers of Viral Vectors and Vector-transduced Cells for Phase I/II Trials
- US Regulations Governing Clinical Trials in Gene Therapy
- Remaining Obstacles to the Success of Cancer Gene Therapy

Focusing on speeding the process in clinical cancer care by bringing therapies as quickly as possible from bench to bedside, *Cancer Gene Therapy by Viral and Non-viral Vectors* is an absolutely vital book for physicians, clinicians, researchers, and students involved in this area of medicine.

### **From reader reviews:**

#### **Alice Hill:**

Book will be written, printed, or illustrated for everything. You can realize everything you want by a reserve. Book has a different type. As it is known to us that book is important thing to bring us around the world. Alongside that you can your reading skill was fluently. A e-book Cancer Gene Therapy by Viral and Non-viral Vectors (Translational Oncology) will make you to possibly be smarter. You can feel far more confidence if you can know about almost everything. But some of you think this open or reading a new book make you bored. It is far from make you fun. Why they might be thought like that? Have you in search of best book or suited book with you?

#### **Steve Pratt:**

Book is to be different for every single grade. Book for children right up until adult are different content. To be sure that book is very important for us. The book Cancer Gene Therapy by Viral and Non-viral Vectors (Translational Oncology) had been making you to know about other knowledge and of course you can take more information. It is very advantages for you. The reserve Cancer Gene Therapy by Viral and Non-viral Vectors (Translational Oncology) is not only giving you a lot more new information but also to be your friend when you sense bored. You can spend your own personal spend time to read your reserve. Try to make relationship with all the book Cancer Gene Therapy by Viral and Non-viral Vectors (Translational Oncology). You never sense lose out for everything in the event you read some books.

#### **Pamela Edmonds:**

Reading a book tends to be new life style in this era globalization. With examining you can get a lot of information that may give you benefit in your life. Using book everyone in this world can share their idea. Books can also inspire a lot of people. Lots of author can inspire their reader with their story or maybe their experience. Not only the storyline that share in the guides. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on earth always try to improve their proficiency in writing, they also doing some investigation before they write to their book. One of them is this Cancer Gene Therapy by Viral and Non-viral Vectors (Translational Oncology).

#### **Henry Slaughter:**

Spent a free time for you to be fun activity to accomplish! A lot of people spent their spare time with their family, or their very own friends. Usually they undertaking activity like watching television, planning to beach, or picnic from the park. They actually doing same task every week. Do you feel it? Will you something different to fill your free time/ holiday? May be reading a book might be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to try out look for book, may be the e-book untitled Cancer Gene Therapy by Viral and Non-viral

Vectors (Translational Oncology) can be good book to read. May be it may be best activity to you.
